Designing an Effective Chart of Accounts for a TV Production Company

Begin by analyzing your company's operations, revenue models, and cost centers. Consider the types of productions, sources of income, and expenses involved.

Step 2: Establish Clear Account Naming Conventions

Use consistent and descriptive naming to facilitate reporting. For example, instead of generic names like "Production Expense," specify "Pre-Production Salaries" or "Set Construction."

Step 3: Use a Logical Numbering System

Implement a numbering hierarchy that groups related accounts. A common approach is:

- 1000s for Assets

- 4000s for Revenue
- 5000s for Expenses

Within expenses, further subdivisions can be made for production, admin, marketing, etc.
