Visual Indicators:

- The engine number is often a combination of letters and digits, such as "M42 1234567."
- It is stamped deeply enough to withstand cleaning and engine wear processes.

Secondary Location: The Engine Block Side

In some models or production years, the engine number can also be found on the left side of the engine block, near the timing chain cover.

Details:

- Position: Visible when looking directly at the side of the engine, typically on the engine block's flat surface.
- Appearance: Engraved or stamped into the metal surface, sometimes covered with a thin layer of paint or grime.
